

SKA (MARTES 5/9)

CONTACTO: JULIAN GARRIDO (IAA) (jgarrido@iaa.es), Lourdes Verdes-Montenegro (lourdes@iaa.es) Javier Moldón (jmoldon@iaa.es), Theresa Wiegert (twiegert@iaa.es).

The Spanish Prototype of a SKA Regional Centre (SPSRC) is currently in use for data from precursors of the SKAO. We will present the ongoing development of the SKA Regional Centre prototype in Spain, as part of a wide international network that will handle the multitudes of data expected from the SKAO (in construction since 2021). We will give an overview of Spain's role in the SKA project and discuss the current status of the SPSRC. This includes what the SPSRC can do now, its services and support to the astronomical community in Spain, and future prospects. A selection from our astronomical community will present how they currently use/ plan to use the services of the SPSRC and a Q&A discussion will conclude the session.
